

Carrasco de La Mancha

Son of Colorado Mezcal (who boasted a micron count of 22.6 at 11 years old) and grandson of Drambuie, Carrasco carries amazing genes. His fleece has nice brightness, a soft handle and high frequency crimp that runs all the way down his legs. His dam has brought amazing fineness to all her crias. We are excited about Carrasco's potential and anxious to see his offspring.

Carrasco will begin his breeding service with some of our own girls in June 2011. He will then be available with an introductory breeding fee of \$500 for a limited time.

Medium Fawn,
ARI #: 1010923

Colorado Mezcal

Medium Fawn,
ARI #: 174230

Like his sire Peruvian Drambuie, Mezcal has sired numerous show winning crias with great fiber and conformation. His sire was considered top of the line when he went to Australia to improve their genetic pool. In addition to his great physical qualities, he settles females quickly, but is not overly aggressive.

Mezcal has offspring ranging in color from white to black. With grey dams, we've gotten grey and black offspring with much improved fiber. In general, his offspring are the color of the dam.

Aside from his great conformation and strong presence, Colorado Mezcal has extraordinarily dense fleece. At 12 years old, his fleece "still" has that very soft handle. One of his daughters in the 2006 Snowmass Auction sold for \$47,000.
